

# Our most advanced 2-channel camera, now with 4G/LTE.

## Protect your drivers and fleet business against

-  Insurance fraud
-  Staged accidents
-  False/exaggerated whiplash claims
-  Conflicting reports of actual events
-  Driving offense allegations

## This 1080p video telematics camera records EXACTLY what happened before, during, and after an incident.

Carriers are phasing out 3G networks by February, 2022. Take steps today to ensure your fleet isn't left blind when the network is pushed off the grid. Plus, the CP2 4G/LTE delivers valuable benefits like:

### Offers a clear, indisputable account of the facts

-  See the driver's view of the road as well as inside the cabin
-  Always know the vehicle GPS location
-  Get critical data like impact force of the accident
-  Hear audio
-  Know the driving behavior (speed, acceleration, braking, and steering)

## Ensures your fleet is on the cutting edge of technology

- ✓ 1080p wide angle HD camera
- ✓ Up to 256 GB SD storage
- ✓ Real-time video sent via email or to your telematics software
- ✓ Instant notification of events and live GPS location tracking
- ✓ Tamper-resistant design
- ✓ Wi-fi enabled, Bluetooth 4.2 and LTE

## Further your peace-of-mind with an additional camera

---

Connect a second camera to the main unit for recording the vehicle interior

---

Get insight on valuable driver behavior (distracted driving, use of seatbelt, use of electronic devices)

---

Real-time video sent automatically to your telematics software plus optional email alerts

---
